PROFESSIONAL SUMMARY

Technology consulting professional with 6+ years at Oracle Consulting, Deloitte, and Oracle NetSuite — combining enterprise ERP architecture, AI/LLM solution design, and end-to-end program delivery on \$20M+ transformation programs. Deep functional and technical expertise across Oracle Cloud and NetSuite platforms, system integrations architecture, and full-lifecycle SDLC delivery from design through hypercare. Practitioner of GenAI tools; built and operationalized an enterprise AI framework adopted org-wide — MCP blueprint, LLM-based prompt architecture, and training roadmaps for internal and external purposes. Cross-industry delivery breadth spanning finance, professional services, high-tech, and media — SMB to Fortune 500. Certified in Oracle Cloud Infrastructure AI and Generative AI.

PROFESSIONAL EXPERIENCE

Oracle NetSuite

Jul 2024 – Present
Los Angeles, CA

Solution Consultant – AMO Emerging | Services

- Architect ERP and integration solutions across 30+ active SMB/Mid-Market client engagements weekly; translate ambiguous business requirements into scalable technology designs across all industries within XaaS (“Anything as a Service”)
- Built and operationalized an AI/LLM enablement framework for enterprise ERP environments—architected 125+ structured prompts by business function and persona, designed and delivered 500+ AI-centered live demonstrations since rollout
- Spearheaded the *AI in NetSuite* knowledge transfer initiative across the practice—seven structured programs on prompt engineering methodology, use case qualification, and GenAI pitfall mitigation; enhanced internal readiness and client-facing credibility with launch
- Serve as one of two certified architects for end-to-end integration engagements org-wide — leading discovery, scoping, and solution design to align with clients’ system landscape and operating model requirements; oversee 50% of the organization’s integration pipeline
- Own solution engineering and advisory across 20+ functional domains—conduct systems review, use case analysis, scope integration and ERP solutions, and deliver technical recommendations in context of business objectives
- Selected as subject matter expert to lead product enablement sessions at SuiteWorld (FY25); nominated to present on NetSuite Integration Platform and AI solutions at SuiteConnect (FY26)—demonstrating expertise in key components of tech strategy

Deloitte Consulting

Aug 2021 – Jun 2023
Los Angeles, CA

Consultant — Oracle Fusion ERP | Enterprise Commercial FIN

- Led SDLC delivery governance as functional lead across six Oracle Fusion ERP enterprise implementations at Deloitte—accountable for program management, solution architecture, functional configuration, and end-to-end testing using Agile and Waterfall delivery frameworks
- Led supply chain process architecture redesign on a \$30M Oracle Fusion SCM/ERP program—restructured 30,000+ line BOMs, reduced item structure data sets by 40% to resolve a high-risk bottleneck and restore program momentum; leveraged project use case to develop reusable transformation tools scaled across industries and product lines
- Designed and deployed enterprise transaction governance infrastructure—75+ multi-layered, logic-driven approval workflows creating audit-ready controls for Fortune 500 finance operations
- Directed full-lifecycle SDLC delivery governance across enterprise Oracle Fusion implementations — led 8-week in-person SIT/UAT program across 300+ test cases, restructured the defect management system, and managed cross-functional workstreams —resulting in a 30% reduction in the defect backlog, testing completed within the projected timeline, and a streamlined communication structure
- Developed 40+ industry-specific technology enablement analyses and GTM strategy playbooks used to sharpen the firm’s competitive positioning and equip pursuit teams across commercial markets

Oracle Consulting

Aug 2019 – Aug 2021
Austin, TX

Senior Cloud Analyst – Oracle Fusion ERP | PMO

- Governed delivery architecture and executive stakeholder alignment across two concurrent \$20M+ Oracle Cloud enterprise transformation programs — designed and facilitated Ways of Working Workshop that resolved cross-functional impasse; drove operating model alignment across both programs through key milestones: mobilization and global design
- Co-architected Oracle Consulting’s Global Deployment Toolkit — a five-component enterprise architecture and target-state delivery framework adopted as the firm’s global implementation standards and established a repeatable governance infrastructure

Cloud Analyst – Oracle Fusion ERP | PMO

- Designed and facilitated Project Kickoff for 250+ global stakeholders; oversaw Health Checks covering 500+ complex configurations, customizations, and integrations for multinational programs

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional
- Oracle NetSuite Certified SuiteFoundation Specialist
- Oracle NetSuite Certified Financial User
- Oracle Financials Cloud: General Ledger 2019 Certified Implementation Specialist
- Oracle Financials Cloud: Accounts Payable 2021 Certified Implementation Specialist
